About us

Kosmos Innovation Center (KIC) has established a Center of Excellence in Ejisu, Kumasi, as part of efforts to promote accessibility of maker centers for young start-ups and entrepreneurs within the country and sub-region, as they develop innovative solutions to support the agricultural and agri-adjacent sectors.

The KIC Center of Excellence - Kumasi is aimed at empowering young entrepreneurs in Ghana to develop innovative solutions for the agricultural sector. The KIC Center of Excellence - Kumasi comprises 6 specialized maker centers designed to facilitate the development of agricultural technologies and innovations. These centers will be instrumental in transforming ideas into tangible, market-ready solutions.

The KIC Center of Excellence - Kumasi has been set up with support from the Mastercard Foundation to bring many young people into work, through entrepreneurship.

The Center of Excellence comprises the following innovation maker centers:

Food Innovation Center – provides facilities for testing and developing new food products, new ways of food processing, packaging and safety.

Electronics Center - will serve as the nerve center for the development of electronic components crucial to modern agricultural technologies.

Mechatronics Center - essential for the development of smart, automated agricultural machinery and systems.

Computer Design Center - dedicated to the digital conception and visualization of agricultural products and systems.

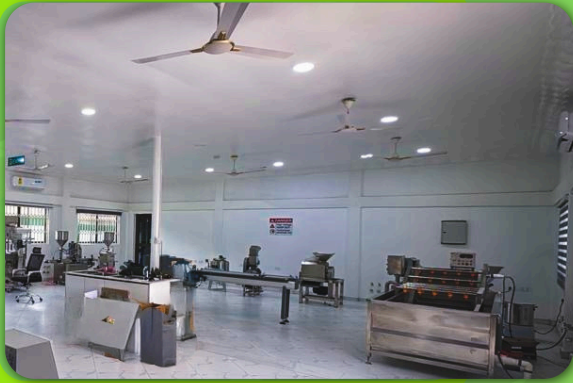

Metal Fabrication Center – creation of durable, high-strength metal components and structures essential for agricultural machinery and tools.

Woodwork Center - caters for projects requiring wooden components, offering tools and equipment for cutting, shaping, and assembling wood.

The **KIC Center of Excellence - Kumasi** is expected to serve Start-ups from KIC's Business Incubation Program as well as start-ups who would like to access the services of any of the 6 maker centers for regulatory prototyping, design and fabrication.
